FAST INSTALLATION WITH MINIMUM WALL DAMAGE.

PREFRAMED PANELS READILY INTERCHANGEABLE.

FOR: SENIOR HIGH SCHOOLS
UNIVERSITIES
INSTITUTIONS
PUBLIC BUILDINGS

SPECIFICATIONS:

Fixed panel trim shall be Richelieu Building Specialties System 200 from 6063T5 aluminum with E/S .005 satin anodized finish. Trim channel will have continuous mitered corners and shall contain not more than two butt joints for units up to 3665 mm. Chalkrail shall be one piece with ends bevelled and polished. All units shall have trip shop applied and secured to panel from back. Wall mounting angle shall be installed full length of unit and shall be prepunched and slotted for mounting screws.

NOTE: Although units over 3665 mm are not recommended, it is possible to provide units up to 7300 mm using vertical dividers which must be secured to the wall. Chalkrail can be continuous by installing after unit is in place.
