

**CLICK STOP set contains:**  
 -1 left and right guiding cam for each side wall  
 -1 left and right locking unit for the pull-out shelf or drawer

Locking mechanism that can be installed to any wood drawer or pull-out shelf equipped with undermount slides. The Click Stop allows the drawer or shelf to lock in an OPEN position, providing a stable usable surface. It can easily be released by gently pulling towards you before pushing the shelf/drawer back in place. Also compatible with Richelieu's EXTENDO metal drawers in the FIORO line.

## ▶ Application

- Can be used in a kitchen under a microwave cabinet to create a temporary shelf or under the countertop to create a temporary extension to hold an appliance. Also great for laundry room application or in a walk-in closet.

## ▶ Advantages

- Create an instant and safe working surface on demand; then tuck away when finished .
- Adaptable to any pull-out wood shelf or wood drawer with conventional undermount slides.
- Can be retrofitted.
- Also compatible with our EXTENDO metal drawers.
- Easy to install and easy to use.
- To unlock, simply pull shelf towards you and then push back into place.
- 25mm (1") spacer is available for Face Frame application. 2 spacers required.

## ▶ Description

Locking mechanism that can be installed to any wood drawer or pull-out shelf equipped with undermount slides. The Click Stop allows the drawer or shelf to lock in an OPEN position, providing a stable usable surface. It can easily be released by gently pulling towards you before pushing the shelf/drawer back in place. Also compatible with Richelieu's EXTENDO metal drawers in the FIORO line.

For a Face-Frame cabinet application, you will need to get 2X spacers (#2223906) to compensate for the frame width.
