

Harmony™ Finishing

FINISHING STEPS

This practical guide offers step-by-step instructions to obtain a finish that will be as glossy as the original.

REPAIR STEPS

1. Assess what type of repair is needed in order to select the appropriate sandpaper grit for the job.
2. Before sanding, wipe the surface with a microfiber cloth (#A9915B)
3. Use a Microstar P1500 (#AFM6111500) grit sandpaper dry with an interface pad (#A9166) to remove coarse imperfections.
 - For very coarse imperfections, Microstar P1000 (#AFM6111000) grit can be used.
 - Wipe the surface with a microfiber cloth (#A9915B).
4. Use "Abralon" 3000 grit sandpaper damp to enhance the shine and ease the polishing. (#A8A2413000)
5. Using a lamb's wool (#AMPADLW75), apply Polarshine 10 (#APC101L) polishing paste with a polishing machine set at 1,000 rpm.
 - Wipe the surface with a microfiber cloth (#A9915B)
6. Using black foam pad (#AMPADBF8), apply Polarshine 5 (#AFC51L) polishing compound with a polishing machine set at 1,500 rpm.
 - Wipe the surface with a microfiber cloth (#A9915B)
