

Organoid

Textured and Scented Decorative Panels

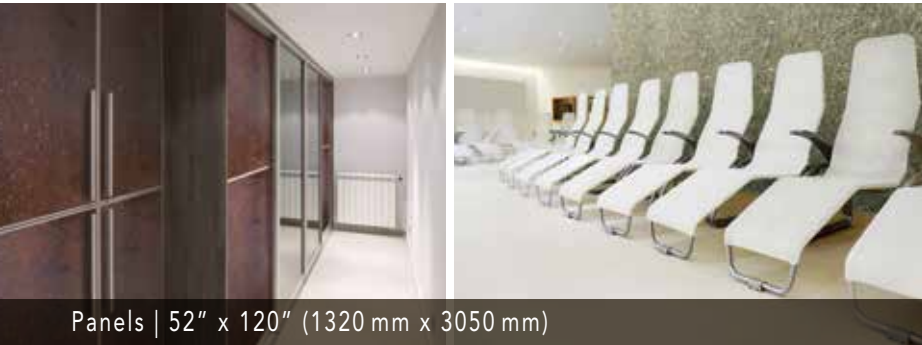

Organoid

Textured and Scented Decorative Panels

Organoid panels are made from organic natural materials such as grass, leaves, hemp fibers, flowers, herbs, bark and seeds. These visually striking laminates are untreated to retain their natural properties of texture and fragrance and offer a natural experience with all senses.

Organoid panels are designed for upright light-duty indoor applications or roofed outdoor applications. Choose from 12 different coatings or customize your panel with selected raw materials that perfectly complement your surrounding environment.

Panels | 52" x 120" (1320 mm x 3050 mm)

Lavender | LAWENDL
Total Thickness : 5/32" (3.9 mm)
ORG008240
