LED

A LED (light-emitting diode) offers consistent color quality and no UV light, so it won't fade product. It is ideal for accent lighting in furniture, cabinets and displays, where light is required in tight spaces. When the power to a LED is converted into light, minimal heat is produced which makes them an especially safe light source in any environment. LED lights have a remarkable long life due to the fact that they do not use bulbs; there is an electronic component that emits its highest light output for up to 50,000 hours. With a lower consumption per watt, available in both warm and cool white. LED lights are at the cutting edge of lighting technology and the ideal solution for all commercial designs!

HALOGEN

Halogen fixtures generate a white, vibrant light, they last longer and produce more lumens per watt then the traditional incandescent versions. With an average life cycle of 2000 to 4000 hours, halogen solutions remain an excellent option for counter lighting.

FLUORESCENTS

Fluorescents produce less heat and are chosen due to their energy efficiency. They are engineered to send light in all directions, providing excellent light coverage. T4 and T5 compact solutions make the installation of residential or commercial lighting the easiest of all lighting options. Under kitchen cabinets they act as task lighting for a countertop. In a display cabinet they show off prized possessions.

XENON

Xenon lighting combines the advantages of a longer life bulb and lower bulb temperatures making them incredibly efficient and a wise choice for lighting.

INCANDESCENT: THE DEPENDABLE ORIGINAL

The classic ¨normal light bulb¨ we're all familiar with. These bulbs have a very thin tungsten filament housed inside a glass sphere. Incandescent bulbs are inexpensive and really available in a variety of wattage and shapes. They produce a yellowish-white light that is emitted in all directions.

LED GU10 5W Warm White

Bulb available with two different trims to match light trims. Most commercial bulbs available on the market have to reach over 7W per bulb to match or surpass our 5W lumen output. Lighting can account for up to 20% or 25% of a home's energy costs, so switching can result in savings on monthly energy bills. LED bulb lasts 2 to 4 times longer than a CFL, and 25 to 35 times longer than a standard incandescent bulb.

- Will not fade fabrics or furnishings
- Replaces standard 50W halogen
- Aluminum case

- Kelvin Color Temperature: 3,700° K
- Angle: 38°
- Voltage: 120 V

LED Lighting

Pockit® Adapt

As the name suggests, this Pockit® is adaptable to specific applications using one of three included lenses. Whether your application calls for a narrow or wide angle spot, only a simple change of the lens is needed. Its 3/8" depth (9.5 mm) makes this one of the lowest profile spot lights in the industry while generating a staggering 250 lumen output.

- High output 5W LED
- Easy and quick installation - no electrician required
- Installation: Recessed or Surface Mounted
- Voltage: 12 V
- Luminous Flux: 250 Lumen

Includes:
- Three beam-angle changing lenses included: 25°, 45°, 60°
- 79" (2 m) Starter Cord, and AMP® Connector are included with each light

LED Pockit® 120V - 3W

The Pockit® 120 is a true plug-and-play lighting solution. It allows for easy "jumping" over and around obstacles without the need for an electrician and can be recessed or surface mounted to accommodate your design and decor. You can easily retrofit existing fluorescent display lights with the Pockit® 120, providing striking, high illumination at a fraction of the energy costs and heat generated by traditional lights.

- Easy-to-replace twist on/off LED bulbs (GX53 base)
- Surface or recess mount with springs
- Linkable up to 10 fixtures
- True plug and play: no transformer or power supply required
- Dimmable
- Replaceable LED heads
- Frosted diffuser lens
- 118 Lumens
- Efficacy (lm/W): 39

Includes:
- 9" (229 mm) input/output leads attached to fixtures
- Trim Kit is included with each Light Body, which is required when mounting the light to a surface
- All Pockit® lights can be either surface mounted or recess mounted

Power Pockit® LED Puck Lighting 12VDC 3W

Provides powerful, bright light without high energy consumption and heat. The COB diode technology is far superior than traditional surface mount diodes and eliminates any hot spots or pixelated look. No unsightly diodes or reflections from surfaces. The Power Pockit® 3W is a versatile choice offering flood and task lighting that can be used for interior cabinets, under cabinets, and store displays. This 3W energy efficient LED provides a crisp, uniform wash over illuminated objects at a fraction of the price of halogen.

- Quick and easy recess or surface mounting
- 3/8" profile surface mount
- All-metal construction
- 1/2" overall thickness (surface mount)
- 120° light spread
- Required: 12VDC power supply

Includes:
- Surface Mount Ring, AMP® Connector, and 79" of wiring. All Pockit lights can be either surface mounted or recess mounted

Eurolinx 12 VDC

The Eurolinx flat profile blends in with any application. Using specialized diffuser and reflector technology to achieve Luniform output, this European styled light is a perfect choice for all contemporary and high-end commercial applications. Use the magnets within the U-Clips for metal shelving or office furniture mounting. At 4W per foot and over 200 lumens, Eurolinx is a top pick for high illumination.

- Mounting clips with integrated magnets allow for metal surface mounting as well as traditional screw mounting
- Linkable (back-to-back or link cord) up to 10' continuous run
- Two beam spreads based on orientation
- Luniform technology
- Available in four lengths
- Max Per 60W Power Supply: 15'
- Max Continuous Run: 10'
- Required: LED 12V power supply

FineLine LED Strip Lights

Long and narrow, FineLine is the unobtrusive way to provide smooth, linear lighting almost anywhere. The low profile design features a frosted diffuser for even illumination. With optional manual or remote control dimmers, creating the perfect atmosphere is effortless. The FineLine is available in 3 lengths: - 8" - 12" - 22". The FineLine can link light to light without a link cord. It's as easy as a snap. There are no gaps, no dark spots, only a continuous line of light. The FineLine features a sturdy aluminum body.

- The low-profile FineLine features a frosted diffuser for perfect, even illumination
- 90° beam spread
- Maximum continuous run: 12 feet to prevent voltage drop
- Maximum 24 feet per 60W power supply
- Required: 12VDC power supply

LED Capsens Switch 12Vdc and 24Vdc

CapsSens is a special hidden electronic touch sensitive sensor switch designed to be applied to the back side of the surfaces (e.g., wood, plastic, glass, and other opaque or transparent non-metal materials). CapsSens functions with both 12Vdc and 24Vdc 30-60W max, therefore it operates at a very low safety voltage. To switch on/off without making physical contact with the switch but only by touching the surface where it is installed.

• Not only does it act as an on/off switch but also has built in dimming function.
• CapsSens has a memory, so once you find your favorite setting and then power down your lights, next time you turn them on CapsSens will turn the lights on how you last left them.
• CapsSens has automatic shut down after 18 hours of continuous usage, a built in safety feature.
• Integrated "soft-start" and "soft_stop" function.
• To be used with the follow materials: Wood: maximum thickness of 30 mm. Plexiglass: maximum thickness of 20 mm. Glass: maximum thickness of 12 mm. Activation area approx. 50 mm diameter.

Aluminum Profiles

Closet Rod Profile

This system is designed and manufactured in Canada and uses robust hardware to ensure that whatever is put on this rod, stays. 8' aluminum profile with opal lens offers the perfect customizable solution for closets! Bring light into the closet one rod at a time using the LED tape light roll (sold separately).

⊖ 30 mm

- Made of anodized aluminum and includes opal lens
- Customized lighting for your customers in minutes with cut-to-size
- Fast and easy installation with or without lighting
- Aluminum profile solutions are in great demand as they allow our clients to customize their designs for their customers like never before
- Opal lens was specifically chosen to offer a nice level of light to light up cabinets without the dot effect

Included Product(s):
Includes opal lens that creates the no dot effect and was specifically developed to create a ghost effect lighting; soft and clean with no dot effect.

PRODUCT	FINISH	LENGTH
30147850	Anodized Aluminum	8' (2.44 m)

Requires one of the following products:
Supports, Matte Nickel – 2215602184, 2215603184, 2215611184 or 2215612184
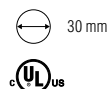

Toucan Profile

TOUCAN is a profile to accommodate any glass shelf. It is made of an extruded double section; a rigid section 40" long made of aluminum that contains the light source (sold separately) and a soft section 96" long that allows for pressure application on 6 mm and 8 mm thick shelves. Applied to frosted glass shelves, it generates a light effect that is diffused across the entire surface. Applied on transparent glass shelves, it lights the front edge.

9/16"
(14 mm)

- Profile for glass shelves
- Tape light sold separately
- Designed for 6 mm to 8 mm shelves
- All pieces are sold separately

PRODUCT	FINISH	LENGTH	MATERIAL

Interior Cabinet Profile

Angled just right, this aluminum profile with opal lens lights up interior cabinets using the LED tape light roll (sold separately) without having light glaring into one's eyes.

19/32"
(15.3 mm)
(40 mm)

- Easy under-shelf surface mount installation with two sided tape sold separately
- Directs the beam of light down at a 45° angle so lighting never glares into eyes
- Angled profile allows for perfect illumination of cabinet interiors exactly where it is needed

Included Product(s):
Includes opal lens that creates the no dot effect and was specifically developed to create a ghost effect lighting; soft and clean with no dot effect.

Surface Curved Aluminum Profile with Lens

Specially designed to hide brackets and wires. Widely used for under cabinet lighting. A very aesthetic look with its curved appearance. Optimize the lighting of the items on your shelves and racks with this versatile profile. Aluminum profile solutions are in great demand as they give our customers the ability to customize their designs like never before. Opal lens was specifically chosen to offer a nice level of light to light up cabinets without the dot effect. Clearly the denser the lens is, the less light that can pass through it. For example, a clear lens will offer 96.5% translucency with only 20% diffusion (clear meaning the lens is clean and the tape light is visible) while the opal lens offers 65% translucency with 100% diffusion.

• Richelieu's new aluminum SURFACE CURVED profile solution fits tape light and tape light rolls
• Included opal lens creates the no dot effect and gives a uniform look to the added lighting with no hot spots
• Designed for installation under cabinets or inside furniture
• Customize your lengths as needed profiles can be cut easily with a miter saw
• Opal lens efficacy is 50% of the originally emitted light source
• Material: Aluminum

Aluminum Profile 5/8" Recessed

A compact recessed profile allows you to make the LED source invisible. The edges on each side of this extrusion allow recessed installation giving it style with a discreet and neat appearance. Aluminium profile solutions are in great demand as they enable our customers to customize their designs for their customers like never before.

• Richelieu's aluminum RECESSED profile solution fits tape light and tape light rolls
• Designed for installation under cabinets or within furniture
• Customize your lengths as needed; profiles can be cut easily with a miter saw
• Slim design

Infinex Extrusion

Infinex is the innovative, patent-pending LED aluminum extrusion system. Gone are the days of set fixture sizes – simply choose your style, cut to desired length and assemble to create a customized LED fixture. Designed by our in-house engineers and made in the USA, Infinex carries a UL safety certification and is available in five profiles with an array of installation options. Infinex is designed for easy DIY application.

Incandescent Replacement Bulbs

The classic "normal light bulb" we're all familiar with. These bulbs have a very thin tungsten filament housed inside a glass sphere. Incandescent bulbs are inexpensive and readily available in a variety of wattages and shapes. They produce a yellowish-white light that is emitted in all directions. Average life span of 1000 hours.

Decora® Digital Controls with Bluetooth® Technology

Lighting control in the palm of your hand. The next generation of lighting control technology is here. Bridging the gap between traditional switches and whole-house automation systems, Decora Digital. Controls with Bluetooth® technology provide local control within a 30 foot* range without the need of a hub, gateway or internet connection.

• Fits in a standard wallbox, is compatible with standard wallplates (sold separately)
• Uses simple, intuitive on-screen menu options
• Individually control and program dimmers and switches within the home
• Each device can be uniquely named for easy identification
• Perfect for use in residential applications such as kitchens, bedrooms, and home offices
• Each device can be uniquely named for easy identification
• Flexibility to program timed events weekdays, weekends, or any combination of days at set or random times
• Astronomical clock automatically adjusts to local sunrise/sunset times
• Automatic daylight saving time adjustment
• Countdown sleep timer can be set for up to 12 hours
• LED locator light can be turned off via app
• Single pole or 3-way/multi-location control with Decora Digital remote (sold separately)
• Voltage: 120 V

Includes:
• 3 changeable face plates
• Single pole, 3-way/multi-location

Application: Digital Devices are ideal for living rooms, bedrooms, kitchens, dining rooms, home offices, outdoors, or anywhere full control of lighting is desired.

Humidity Sensor

The Leviton Humidity Sensor and Fan Control automatically detects excess humidity in a room and activates the ventilation fan to lessen condensation which helps reduce mold and mildew. The sensor uses a microprocessor combined with state-of-the-art digital sensing technology to continuously monitor and manage humidity levels in areas of the home prone to condensation and mildew. It features user-friendly controls to adjust sensitivity, humidity level and time-out settings.

Automatic Humidity Control Mode – The sensor will automatically turn the fan ON upon detecting excess humidity. The sensor will continue to monitor the ambient air and automatically turn the fan OFF when the humidity level has dropped. Manual Operation – For immediate ventilation needs, the user can manually switch the fan ON or OFF by pressing the fan icon. The fan will run for 10 minutes and automatically turn OFF (time out period can be adjusted). If humidity levels change, the sensor will shift into automatic mode and time out accordingly. Air Cycle Mode – The Air Cycle mode automatically turns ON a ventilation fan for a set period of time and repeats the cycle hourly. (eg. 20 minutes ON/40 minutes OFF each hour).

• Load Rating: 600W Incandescent, 150W LED/CFL, 400VA Inductive/Ballast, 1/6th HP Motor
• Voltage: 120 Volt AC 60 Hz
• Switch Type: Single-Pole
• Fits in a standard wallbox and is compatible with standard wallplates (sold separately)
• Replaces a single pole switch for control of ventilation fan or a fan/light combination
• Installation: Wall Mounted

Application: Bathrooms, wine cellars, basements, laundry rooms, and home spas.
