

Trim Rings for LED 3W Atom

Product # 12614195

Finish Satin Nickel

Information 20° Angled Trim Ring

Shape Angle

DESCRIPTION

For surface mount installation

The ATOM puck is designed to be flush-mounted in furniture, cupboards, etc.

If you require surface mounting, you will need a mounting ring. There are 2 ring options:

- Round for standard straight mounting
- Angled for mounting at an angle

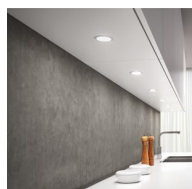

Note: Fixtures, rings and accessories are sold separately.

ADVANTAGES AND BENEFITS

- The surface mount application allows rapid installation without the need to drill holes in the cabinet. - Items 12614195 and 12614030 have asymmetrical structures and are designed for surface installations in contact with the wall. - The 20° inclination allows the light to be projected to the center of the work area. Atom 45° trim ring is ideal for under-cabinet installation.
