B

B-Moved Motion Transmission Bar

Product # 189BEMTYPB

Door Installation Left and right hand

Compatible with PS48 / PS40

Load Capacity 30 to 80 kg

Door Thickness 18 to 53 mm

Door Width 1 154 to 1 900 mm

DESCRIPTION

Electric motor for sliding doors

The B-Moved Motion Transmission Bar is an electric motor engineered to move sliding doors for the systems PS40, PS48, and PS66. Select from four types of motion transmission bars. Base your selection first on the compatibility of the sliding system and then on door width. The motion transmission bar mounts within the PS66 sliding mechanisms and to an upper aluminum profile on top of the cabinet and behind the track for the PS40 and PS48 systems. Note to plan for extra depth to fit the motion transmission bar as per the instructions. A connector bracket set connects the PS40 and PS48 to the motion transmission bar. For the PS66, the connector bracket is included.

IMPORTANT: Use metric dimensions for greater accuracy during installation.

ADVANTAGES AND BENEFITS

* Compatible with PS40, PS48, and PS66 sliding door systems * Concealed Motor * Smooth Running

TECHNICAL SPECIFICATIONS

Product #	189BEMTYPB
Product type	Mounting Accessories
Door Material	Wood, Glass
Door Height	1 000 to 3 000 mm
Number of Doors	1
Brand	CINETTO
Brand Model	Cinetto B-Moved

APPLICATION

Wardrobe, Storage, Furniture, Armoire, Bookshelf

INCLUDED PRODUCT(S)

1 transmission bar

IMPORTANT INFORMATION

Select the correct transmission bar for the appropriate system and door width. Use metric dimensions for greater accuracy during installation. Please make sure to read the entirety of the installation manual before proceeding with the installation. Always remove debris/dust/residues (sawdust and/or aluminum) from all tracks and guide channels using a dry cloth during installation and before operating the system. Never spray lubricant on this product. Do not exceed stated limitations and parameters. This will cause early wear and performance failure.
