

Kerfkore Panel - Econokore

Product # 2753884

Width 96 in

Length 48 in

Flex Groove Parallel to the 4' Side

DESCRIPTION

A flexible product that can be easily bent and attached to a ribbed frame by nails, staples or glue. Requires no special tools. 2-ply construction offers a stable and balanced panel.

ADVANTAGES AND BENEFITS

Can be formed by gluing two pieces back to back to form a freestanding curved panel, such as: - Doors - Drawer fronts - Other similar products The panel is sanded and calibrated for consistent size and thickness. - Provides smoother, more symmetrical laminating or painting surface - All materials are manufactured in a controlled environment - No special tools or installation steps needed

TECHNICAL SPECIFICATIONS

Product #	2753884
Thickness	3/8 in
Finish	Natural
Material	High-Density Fiberboard
Collection	Econokore
Color Group	Natural

APPLICATION

- Should be formed prior to face lamination. - PVC adhesive is recommended for this fabrication technique, as it will result in a more stable and rigid bond.

IMPORTANT INFORMATION

- The recommended bending radius is approximately 6-8 inches. - Horizontal or vertical-grade laminates are recommended.
