

## Recessed Angled Cabinet Profile

**Product #** 30145450

### DESCRIPTION

#### Made in North America

This profile is a compact recessed LED lighting profile for cabinetry and other wood furnishing. It projects and directs the light beam at a 25° angle, which allows you to light the cabinet contents from the edge.

Aluminum profile solutions are in great demand as they allows our customers the ability to customize their designs for their customers like never before.

### ADVANTAGES AND BENEFITS

LED tape light sold separately. You have many options to choose from. Please visit the lighting section at Richelieu.com Opal lens was specifically chosen to offer a nice level of light to light up cabinets without the dot effect. Clearly, the denser the lens, the less light that can pass through. For example, a clear lens will offer 96.5% translucency with only 20% diffusion (clear meaning the lens is clean and the tape light is visible) the opal lens offers 65% translucency with 100% diffusion Opal lens efficacy is 50% of the originally emitted light source . Designed to meet North American woodworking standards. Snap-in lens feature. Included opal lens creates the no dot effect. Customized lighting for your customers in minutes! Angled profile allows for perfect illumination of cabinet interiors exactly where it is needed. Included opal lens was specifically developed to create a ghost effect lighting; soft and clean with no dot effect.
