

Closet Rod Profile

Product # 30147850

Finish Aluminum

DESCRIPTION

Made in North America

Finally a system that makes sense! This system is designed and manufactured in Canada and uses robust hardware to ensure that whatever is put on this rod, stays on the rod.

8' aluminum profile with opal lens offers the perfect customizable solution for closets! Add light to the closet one rod at a time using the LED tape light roll (sold separately).

ADVANTAGES AND BENEFITS

Made of anodized aluminum and includes opal lens. Customized lighting for your customers in minutes with cut-to-size! Fast and easy installation with or without lighting. Aluminum profile solutions are in great demand as they allow our clients to customize their designs for their customers like never before. Opal lens was specifically chosen to offer a nice level of light to light up cabinets without the dot effect. Clearly, the denser the lens is the less light that can pass through. For example, a clear lens will offer 96.5% translucency with only 20% diffusion (clear - meaning the lens is clean and the tape light is visible) the opal lens offers 65% translucency with 100% diffusion. Opal lens efficacy is 50% of the originally emitted light source.

REQUIRED PRODUCTS!

Requires ONE of the following products

Sales unit

Closet Rod Support - 1-5/16" (3.33 cm)
Product # 2215611174

OR
