

T-ABLE XL III Table Extension Mechanism 4119 Series

Product # 4119192210

DESCRIPTION

Functional side table, ready instantly

ADVANTAGES AND BENEFITS

Optimizes space in a small kitchen. Hidden in a cabinet when not in use (takes the space normally used by a drawer). Double solution when combined with the extensible T-Bench n° 4117194510. Designed to be installed in a cabinet with an exterior width of 600 mm. The top panel of the table must be made by the client. Color: aluminum.

Extension	51 5/8 in*
Finish	Anodized Aluminum
Material	Aluminum

Disclaimer

Measures shown with an asterisk (*) have been converted as per your preference. These are not the official measures. To view the measures specified by the manufacturer, [click here](#).

APPLICATION

Complete system, only the top panel must be made by the client, which enables harmonization with the counter. Aluminum steel rail with high-load capacity of 100 kg (200 lb), evenly distributed. Can be installed in place of a drawer, behind the hinged front panel that tilts towards the back enabling the table to tilt towards the cabinet. Sturdy, extendable and collapsible aluminum legs. Top, front table panels insert into dowels that hold them firmly in place. The back panel is fixed. Suitable for widths of 600 mm (23-5/8"). Approximate total extension of the table: 1,310 mm (51-9/16").

IMPORTANT INFORMATION

Lateral panel thickness varies between 15 mm and 20 mm (from 19/32" to 25/32"). Spacers are included to adjust the mechanism to the interior width.
