

Locking Handle for Interior Drawer

Product # 502595910

DESCRIPTION

The interior drawer latch provides comfort and automatically opens the upper drawer to allow direct access to the items stored. By activating the stable interlock mechanism of the latch, a simple and direct access to the lower drawer also remains possible and the upper drawer remains in the cabinet interior. The interior drawer front Facia features a stable construction made of high-quality polymers, and has a pleasant haptic quality, perfect for fulfilling its role as a practical and elegant accessory for interior drawers.

ADVANTAGES AND BENEFITS

- Easy assembly and disassembly - Adaptable to all established drawer systems - Torsionally stiff front - Design adapts to different drawer systems - Adapts to all standard drawer systems due to a low installation depth

TECHNICAL SPECIFICATIONS
