

Rectangular Dial Lock - Free Code

Product # 58018390

Wood Panel Thickness 5/8 to 23/32 in*

Metal or Glass Panel Thickness 1/32 to 1/8 in*

Position Left

DESCRIPTION

Free Code

The combination is the key.

In order to know that valuables and personal belongings are kept safe, all you need is a freely selected, four-digit code.

Richelieu's new combination locks guarantee that safety by offering the perfect solution with a keyless security lock for all applications.

ADVANTAGES AND BENEFITS

Design: - Contemporary design - Knob also acts as a door handle - Available in right & left version - Visual indication when locked
Functionality: - Free choice of codes - Code is reset after each use - Emergency opening with key possible

APPLICATION

Freecode The Freecode version works in the same as safes or lockers: Place valuables in the compartment, set a personal code with the "Dial Lock", and close the door. When opening the lock again, the present code will be erased automatically. A new code has to be set each time the lock is open. The scrambling feature (the set code is concealed during the locking process) ensures security against unauthorized opening, even with the Freecode. This lock is suitable for cabinet systems with lockers in sports and recreation areas, schools, universities, libraries, museums, shopping centers, exhibition or conference centers, as well as hotels or spas.
