### DESCRIPTION

#### Reduces cross-contamination

A clean shape and antimicrobial properties make this pull ideal for a high traffic environment where minimizing bacteria is a priority.

### ADVANTAGES AND BENEFITS

SANIGUARD® silver ion based antibacterial finish has the power to suppress the growth of bacteria, fungi, yeast, algae, mold, and mildew on the surface of the hardware. SANIGUARD® does not actually kill bacteria. It inhibits the growth of the bacteria. Silver ions will: - Suffocate the microbe: silver ions inhibit membrane transport processes. - Starve the microbe: silver ions interrupt cell metabolism. - Sterilize the microbe: silver ions prevent cell multiplication.
