

Masonry Depressed Center Cutting Blade

Product # 982130

DESCRIPTION

- All wheels are made on modern, fully automatic production lines, ensuring uniform production and consistent high quality
- Premium fiberglass mesh used to reinforce all wheels, increasing wheel safety and extending wheel life
- Premium aluminum oxide grain used for metal wheels
- Grain size and wheel hardness are optimized for efficient cutting and grinding
- Labels and graphics for all wheels are heat embedded, ensuring proper wheel identification for their entire usable life (vs. sticker labels)

TECHNICAL SPECIFICATIONS

| | |
|--------------------------|------------------|
| Product # | 982130 |
| Application Surface | Concrete |
| Diameter | 4 1/2 in |
| Thickness | 1/16 in |
| Abrasive Material | Silicon Carbide |
| Arbor | 7/8 in |
| Type | Type 27A |
| Packaging Specifications | Bulk, With Label |
| Brand | Mibro |

APPLICATION

Used for cutting metals, stainless steels, and masonry at a 90° angle
