

## PREMIUM HYBRID Wood Screw, Flat Head with Nibs, Square Drive, Fine Thread, TEK Point

**Product #** FKWNTZ7114PPR

**Length** 1 1/4 in

**Packaging format** Box of 7500

### DESCRIPTION

#### HYBRID Assembly Screw

Our new self-drilling assembly screw is equipped with a TEK point allowing you to easily drill through wood such as hardwood, solid wood, MDF or particleboard. The nibs under the head mill the wood, giving you a perfect finish. In addition, the screw is coated with a non-greasy special lubricant that allows smooth screwing without resistance.

### ADVANTAGES AND BENEFITS

- No pre-drilling required - The TEK point allows easy and clean drilling - Fine-thread screw coated with non-greasy wax to prevent wood splitting and avoid damaging the material - Faster drilling thanks to the square drive which provides excellent stick-fit and cam-out resistance - Nibs under the flat head guarantee a perfect finish - For a quick assembly of all your woodworking projects

### TECHNICAL SPECIFICATIONS

<b>Product #</b>	FKWNTZ7114PPR
<b>Head Type</b>	Flat Head with Nibs
<b>Drive required</b>	Square
<b>Screw Size</b>	7
<b>Thread Type</b>	Fine Thread
<b>Point Type</b>	Self-Drilling (TEK)
<b>Finish</b>	Zinc
<b>Function</b>	Installation
<b>Brand</b>	Reliable, PWR
<b>Drive Size</b>	#2 (Red)
<b>Type of Wood</b>	Hardwood

### APPLICATION

The HYBRID Wood screw is ideal for furniture and cabinet assembly.
