

## Jowacoll 114.60 Dowel Driving Glue

**Product #** JW11460

### DESCRIPTION

Specifically designed PVA glue for low-pressure models from manufacturers Koch, Hoffmann, Lehbrink, Weeke and Accu Systems.

### ADVANTAGES AND BENEFITS

- Very low viscosity - Moderate to long setting speed which contains a UV indicator - Special additives will prevent nozzles from clogging

### TECHNICAL SPECIFICATIONS

<b>Product #</b>	JW11460
<b>Recommended Use</b>	Interior, Dowel Glue
<b>Color Before Application</b>	White
<b>Dried Film</b>	Clear
<b>Viscosity</b>	125 cps
<b>Weight</b>	45 lb
<b>Brand</b>	Jowat
<b>Features</b>	Fluorescent, Slow Drying
<b>VOC Concentration (EPA Method 24)</b>	0 grams per liter
<b>Solid Content (Approx.)</b>	40%
<b>Base</b>	Polyvinyl Acetate Emulsion, Specialized Vinyl Acetate Emulsion
<b>pH</b>	5.0
<b>Freeze/Thaw Stability</b>	Unstable

### APPLICATION

For automatic dowel-driving equipment operating at a low pressure of approximately 5-8 bar (70-120 psi).

### IMPORTANT INFORMATION

Due to the relatively slow set speed, further processing of glued parts should not take place earlier than three hours after application.
