APPLICATION

- Kitchen and bathroom cabinets - Audio-video furniture - Residential cabinets and closets - Shop displays - Office furniture

IMPORTANT INFORMATION

The dimensions of the set are based on the external dimensions of cabinets and are suitable for a three-sided cabinet. A notch in the rail is required for a four-sided cabinet. Using a panel with a thickness of 5/8" (16 mm) gives a precise finish between the panel and rail, while the use of a panel with a thickness of 3/4" (19 mm) gives a finish that reveals 3 mm of panel. An internal depth of >=290 mm is required for installation.

INCLUDED PRODUCT(S)
