

TRESCO FREEDiM Wireless Door Sensor

Product # LWLDSBL

Finish Black

DESCRIPTION

Compared to traditional wired sensors, these innovative new wireless door sensors are easier to install and eliminate the hassle of messy wire management. Using RF technology, the sensors automatically turn lights on when a door is opened. Mount them to the bottom or side of your cabinet frame, then sync with the push of a button to the receiver (sold separately LWLDSREC) and enjoy fully illuminated cabinets without the hassle or mess of running wires. Sensors are available in black or nickel, run on long-lasting CR2025 batteries, and are backed by a three-year warranty.

ADVANTAGES AND BENEFITS

- No cumbersome, messy wires to have to hide inside your cabinetry
- Activated by magnet; simply adhere to inside of cabinet door with included double-stick adhesive
- Simple one-touch pairing with receiver
- Easy to replace, long-lasting 3 V CR2025 battery
