

## Sand Thru Stick

**Product #** M2110001

**Color** Umber

### DESCRIPTION

The new Sand Thru Sticks are used to add color to light edges or white edges after sanding during the finishing process. They can also fill small imperfections on the edge.

The Sand Thru Stick is very easy to use. Simply rub the stick along the light edge to add color, rub the edge with a rag and then finish with your normal process.

- Hard wax square stick
- Fill "small" defects in the edge
- Designed to be used off line or on line (hanging line)
- Quick and easy to use
- Can be used during or after your finishing process
- Must be top coated
- Custom colors available
