

Conversion Varnish Reducer/Retarder

Product # M6501057

DESCRIPTION

This unique solvent is specifically blended for Mohawk conversion topcoats and sealers. It can be used to reduce viscosity, to slow down drying time, or to clean up. Use only the Mohawk Conversion Varnish Reducer/Retarder with the Ultra Clear or VersaClad® Conversion Varnish topcoats and sealer to ensure compatibility and professional results.

Warning: not a VOC-exempt solvent. If an exempt solvent is needed, use acetone (M650-001) to reduce Mohawk's VOC-compliant conversion varnish products at a rate of no more than 20%.

TECHNICAL SPECIFICATIONS
