

## Wool-Lube Rubbing Lubricant

**Product #** M7201356

**Volume** 32 oz

**Grade** Paste Form

### DESCRIPTION

Wool-Lube is a multipurpose water-reducible, non-abrasive rubbing and sanding lubricant. Wool-Lube is non-toxic and contains no silicones. Can be used full strength or slightly reduced, with water as a lubricant, with steel wool or abrasive pads to smooth and remove packing marks and scratches from finished surfaces. When reduced with water, Wool-Lube is an excellent sanding lubricant for use with wet/dry sandpapers. Does not interfere with adhesion or drying of lacquer. Finishes rubbed with Wool-Lube and an abrasive can be recoated immediately after being wiped dry. Can be used with dry abrasive powders such as Pumice, Rottenstone, and Tripoli. Use of a sanding lubricant greatly extends the life of waterproof sandpapers.
