

## Acoustic Tiles - Céos Starter Kit

**Product #** N14CHSWFBSK

### DESCRIPTION

#### Peel and stick

The Céos model of acoustic tile features a chevron pattern. The chevron or V-shaped motif originated as pattern in weaving, and has been embraced as a versatile decorative element in the design world.

### ADVANTAGES AND BENEFITS

- One of the advantages of this pattern is the ease of integrating it into any decor. - The zigzag lines will have a beautiful effect wherever you decide to apply this model. - This unique pattern will enhance your design and your living or working environment. - Ideal for covering the walls of a restaurant.

### TECHNICAL SPECIFICATIONS

<b>Product #</b>	N14CHSWFBSK
<b>Collection</b>	Gaia

### IMPORTANT INFORMATION

Using the two different thicknesses of acoustic tile (6.4 mm and 12.7 mm) results in a three-dimensional effect which allows for increased creative expression and also dampens echo in the environment. Dissipation of acoustic energy depends not only on the shape and depth of the acoustic tiles but also the particular properties of our Duotex acoustic felt (porosity, resistivity, etc.).

### APPLICATION

Thanks to the Duotex Tahmea, an adhesive technology applied to the back of the Duotex panel, and the use of the starter kit, the installation of the tiles is simplified!

### DISCLAIMER

Four distinct but harmonious color tones lend an air of comfort and relaxation to the Céos model- Percé Beige is perfectly complemented by the Saint-Sébastien, Westmont, and Fermont shades of gray. This color palette makes for a perfect match with many design styles including contemporary, modern, and minimalist.
