

DCN Cam Lock 1", 1-1/8", 1-3/8" or 1-3/4"

Product # OLDCN410126D

Cylinder Length 1 3/4 in

Key Type Keyed Alike #101

Panel Thickness 1 1/2 to 2 1/8 in

DESCRIPTION

Olympus DCN Series locks (cam lock). Olympus Lock Inc. manufactures cam locks that are easily rekeyable and field reversible. All cylinders include a working top slide mechanism and retainer staple for easy rekeying and field maintenance of lock. Cam locks have a 1 in (25.4 mm) face diameter and include an anti-rotation plate to trap the hex nut and prevent the lock from twisting in the hole. All cam locks are field reversible so that one straight cam and one offset cam can provide all locking positions.

ADVANTAGES AND BENEFITS

- Non-handed--Field reversible locking positions: right-hand, left-hand, vertical and inverted.
- Only 2 cams required
- Ships with reversible straight and offset cams that meet requirements of all locking positions.
- Easy rekeyability--Allows for a quick installation and increased productivity.
- Anti-rotation plate--Eliminates lock rotation, prevents loosening of fixing nut and provides additional security in particleboard applications.

TECHNICAL SPECIFICATIONS

Product #	OLDCN410126D
Cylinder Diameter	3/4 in
Application	Single Drawer, Cabinet Doors
Material	Zinc die cast
Finish	Satin Chrome
Position	Left & Right
Brand	Olympus Lock Inc.
Types of Locks	Cam Locks
