

Piano Hinges - 6.35 cm (2-1/2") Width

Product # PIASTN2H8

DESCRIPTION

Piano hinges, or continuous hinges, derive their name from their original purpose as a hinge on piano lids. They are now used in a variety of wood and metal utilities including chests, foldable doors, trunks, and safes and in heavy-duty utilities including shed and barn doors and fire doors. This type of hinge is made with only 3 three components, which makes it simple to use and install. The load capacity of this type of hinge is unfortunately very difficult to calculate and is mostly dictated by the material used, the thickness of the hinge and the pin diameter. Piano hinges can, however, meet the most demanding needs if chosen carefully.

Piano hinges are a very strong and cost effective way to meet the needs of unusual projects. They can meet the most demanding needs if chosen carefully.

- Made in Canada

TECHNICAL SPECIFICATIONS

Product #	PIASTN2H8
Color/Finish	Nickel
Material	Steel
Width	2 1/2 in
Length	8 ft
Thickness	0.06 in
Type	With Holes
Fastener	#6 Screw

APPLICATION

*Cabinets, storage boxes & outdoor sheds *Aluminum shower doors *Display booths *Security deposit boxes *Money-counter machines
 *Trailers/campers/mobile homes *Waste containers *Casino and arcade machines *Agriculture, construction and airline equipment
 *Large ocean vessels/sail boats (salt, rust and water-proof) *Appliances *Laboratory and medical equipment
