

Secret Gate Latch

Product # RW602US26D

DESCRIPTION

- The secret latch has a concealed spring under the rim, which must be pressed for the latch to open.
- Designed for semi-secure doors such as half-doors at banks where employees on the secured side can simply press the button underneath the latch to open the door.

ADVANTAGES AND BENEFITS

- The large knob is non-functional and is applied just-for-show and confusion.
