

PWR DRIVE PVH - Finishing Head Screw

Product # THTDRTBR7178

Length 1 7/8 in

Packaging format Box of 5000

DESCRIPTION

Ideal for hidden deck fastening

HIDDEN DECK FASTENING WITHOUT JIGS AND CLIPS? IT IS NOW POSSIBLE WITH PVH

All you need is the PVH screw and the T-15 sticky bit that is included in all packages (except bulk boxes). Although the PVH screw is compatible with most jigs on the market, its unique drill tip means you can position the screw right on the corner of the board, without the jig, give it a little push, and the screw will maintain the given angle as you drive it in. The reverse thread gives the required extra push to the board for a solid connection. Simply install the screws face to face at a 45 degree angle on every joist, just as you would with a jig, to produce a deck without any apparent fasteners. It's easy, simple and looks great.

ADVANTAGES AND BENEFITS

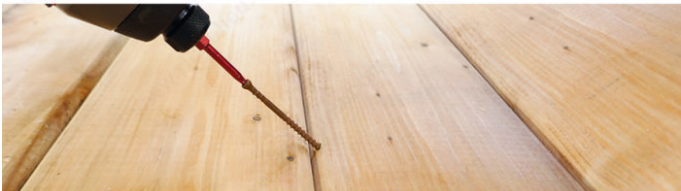

- New T-15 "sticky" star drive - Trim head disappears in material - Reverse threads push on board for stronger assembly - New drill point to prevent splitting

TECHNICAL SPECIFICATIONS

Product #	THTDRTBR7178
Brand	PWR DRIVE
Finish	ACQ Rustproof
Screw Size	7
Drive required	T-15
