

Jowapur 150.5 PUR Laminating Adhesive

Product # 150.51

DESCRIPTION

Polyurethane adhesive designed for bonding vinyl films to particleboard or MDF. This adhesive can be processed without adding a crosslinking agent.

ADVANTAGES AND BENEFITS

- Can be processed without adding crosslinking agent - Excellent film formation - High initial strength - Good water and heat resistance after crosslinking

TECHNICAL SPECIFICATIONS

Product #	150.51
Type	Liquid
Adhesive for use with	Melamine, Laminate, Synthetic materials
Finish/Color	White
Working Temperature	15 °C minimum
Temperature resistance	100 °C
Weight	43.5 lb
Viscosity	3000 cps
Brand	Jowat
Features	High Heat Resistance, Non-Flammable
Freeze/Thaw Stability	Keep From Freezing
Base	Polyurethane
Production Time	Special online order - 14 days
Volume	5 gal.
VOC Concentration (EPA Method 24)	2.7 grams per liter

APPLICATION

Designed for bonding vinyl films to particleboard or MDF. Heat resistance values are higher if the lamination is carried out within 8 hours after adhesive application.
