

## #5553 Red Oak - Evolution HD Veneer

**Product #** FI5553FJ0410RJ

### DESCRIPTION

Evolution HD definition: Engineered wood products are composite wood products made from glued fiber, lumber, and/or veneer to meet specific design criteria. Knots, splits, checks and other naturally occurring wood-weakening characteristics are cut out, reducing the effect of these natural defects to a minimum. These manufacturing processes use less wood fiber to produce strong, specialized wood products.

Bulk packaging, 10 sheets per box.

Sold unvarnished.

### ADVANTAGES AND BENEFITS

High definition: Very precise reconstitution of wood grain pattern Consistency: Minimum pattern and colour variations between veneers Flexibility: Flexible product ideal for applications involving small radius curves
