IR WI-XD

Finish

Aluminum	Black

Features

On/off Wireless	On/off Wireless / On/off Touchless Dimmer

### DESCRIPTION

Wireless IR proximity sensor

A self-powered wireless proximity sensor (with lithium battery).

Two options available:

1. On-off wireless proximity self-powered sensor that can also be used with only the on/off function.
2. On-off touchless dimmer self-powered sensor, than can be used with X-DRIVER TW with on/off and color changeable functions, or with the X-DRIVER with on/off and dimmer functions.

ADVANTAGES AND BENEFITS

- Can be configured with the entire collection of X-DRIVER and X-DRIVER TW converters, complete with CM2-XD or CM2-XD TW (see Suggested Products). - The system is set up simply by pressing the warning light on the X-DRIVER and the configuration button located on the back of the IR WI-XD enclosure. - Each setup is independent, allowing up to seven IR WI-XD devices to be configured with only one X-DRIVER and X-DIVER TW converter. - The wireless solution and easily replaceable battery make installation quick and simple.
