

Ogee Raised Panel Bit

Cut Diameter

2 5/8 in	3 3/8 in
----------	----------

Radius

3/4 in	7/8 in
--------	--------

DESCRIPTION

Create raised panels for cabinet doors, frame-and-panel furniture, and architectural paneling with a raised-panel bit. The cutter forms a fillet to delineate the raised field, a shaped band around the field, and an integral tongue to fit the panel groove in the frame members. The profile contour and the reveal width varies. All tools have 1/2" shanks. Must be used in a table-mounted 3+ horsepower router and run at reduced speed. Use these bits for panels with curved edges. Multiple passes recommended.

Carbide router bits give an excellent finish in solid hardwood and softwood, wood by-products such as MDF plywood, and abrasive materials such as plastic, Corian and other solid surface sheet goods.

AVAILABLE PRODUCTS

Product #	Cut Diameter	Radius
AT54118	2 5/8 in	3/4 in
AT54121	3 3/8 in	7/8 in

TECHNICAL SPECIFICATIONS

Application	Profiling and Rabbeting
Tool	Router
Overall Length	2 1/2 in
Shank Diameter	1/2 in
Material	Carbide Tipped
Brand	Amana
