

Aventos HK-XS Mechanism for Tip-On Door

LF Power factor

180-800

500-1200

800-1600

DESCRIPTION

Aventos HK-XS is a smaller, cost-effective lift system which can be used in applications ranging from shallow-depth cabinets above a refrigerator, to pantries - all with varying front designs and materials.

ADVANTAGES AND BENEFITS

- Designed for tall furniture and high cabinets. - Height: between 240 and 600 mm. - Minimum interior depth: 125 mm. - Easy-open arm: light pressure on face of door causes it to open upwards. - Arm tension is screw-adjustable - Easy installation and adjustment: almost no tools required. - Can be installed on either side (one unit) or on both sides (requires two units). - High-end design.

AVAILABLE PRODUCTS

Product #	LF Power factor
20K1101T	180-800
20K1301T	500-1200
20K1501T	800-1600

TECHNICAL SPECIFICATIONS

Brand	Blum
Type of Opening	Lift-Up Opening
Opening Types	Lift-Up Opening

IMPORTANT INFORMATION

Power factor LF = cabinet height KH (mm) x front weight including double handle weight (kg). The power factor is doubled when used on two sides. For installations where an individual lift mechanism will be operating at the limits of its specifications, a trial application/test is recommended.
