

Auto-Adjust Horizontal Toggle Clamp

DESCRIPTION

Auto-adjust toggle clamps have changed the way toggle clamps are constructed with variable range clamping force and the ability to auto-adjust to variations in workpiece height while maintaining constant clamping force. Now workpieces of differing heights can be clamped quickly and securely - perfect for large and small-scale production situations. Performance flexibility offers advantages beyond traditional toggle clamps: safer operation, more consistent applied force and more flexible tools.

- The toggle clamp auto-adjusts to variations in workpiece height
- Integrated pressure screw allows clamping force adjustment

ADVANTAGES AND BENEFITS

Large ergonomic handle

AVAILABLE PRODUCTS

Product #
STCHH20

TECHNICAL SPECIFICATIONS

Clamp Type	Toggle Clamps
Clamping Force	450 lb
Clamping Capacity	13/16 in
Brand	Bessey
