DESCRIPTION

A continuous CCT range from warm white to cool white

The Atom LED Tunable White complete set is ready-to-use and includes a light fixture, the power supply, and a controller as per selected options.

- Easy installation on various surface applications
- Integrates Tunable White technology which provides the most flexibility in illumination available
- Offers various options for a dynamic control or a static selection of the color temperature from warm white to cool white
- Control options include remote and touch controls

ADVANTAGES AND BENEFITS

- Provides a full range of color temperatures in a single luminaire. - Offers the possibility of creating dynamic personalized environments in any space. - Features excellent color rendering and homogeneity between luminaires. - Control via the handheld remotes enables both the adjustment of color temperature and the selection of dimming options for the entire fixture.
