

Qanto Electric Lift-Up system with LED lighting

Application

Corner
Installation

Island End
Installation

DESCRIPTION

The Qanto Electric Lift-Up System is the ultimate storage solution that maximizes space and accessibility in corner or end cabinets. This innovative system adds functionality and style to usually difficult-to-access corners in L-shaped or U-shaped kitchens, as well as end cabinets. It can also be incorporated in a kitchen island design for an enhanced dynamic space.

ADVANTAGES AND BENEFITS

Ideal for storing small appliances, such as an espresso maker, mixer, cookware, or to create your unique concealed bar. The two shelves lift and descend with a simple touch of a button. The LED lighting is designed for installation under a top shelf to add a wow effect to your decor. Qanto is equipped with a safety stop mechanism as soon as it detects an object between the shelf and counter, making it safe for fingers. The height can be adjusted (adjustable legs included) from 31 1/2 in to 39 3/4 in (800 mm to 1010 mm). UL and CSA certified; simply plug the unit into a standard 120 V outlet.

AVAILABLE PRODUCTS

Product #	Application
