

## Liberta 20 Profile with Shelf Holder

### Finish

## DESCRIPTION

### Designed to align your shelf with the profile

This profile is available in three finishes (matte black, black anthracite, and satin aluminum) and is specially engineered to sit a panel of 5/8 in (16 mm) without effort. Once installed, the panel will be perfectly aligned with the profile.

Possibility of mounting 3/4 in (19 mm) shelves. Simply groove the underside of your panel: 1/8 in (3 mm) in depth and 7/32 in (5 mm) in width.

In addition, glass shelves of 5/32 in (4 mm) and 1/4 in (6 mm) can also be specified. A slight offset will occur between the top of the profile and the glass which will secure the items on the glass.

Profile can easily be cut to size. For a perfect cut, use a miter saw at recommended cutting speed of 2000 rpm.

## AVAILABLE PRODUCTS
